**Test WITHOUT calculator**

<p><b><u>Instructions</u></b></p> <ul style="list-style-type: none"> <li>• <i>This exam consists of 5 questions on 5 pages including this cover page.</i></li> <li>• <i>All questions are compulsory.</i></li> <li>• <i>Answer directly on the question paper</i></li> <li>• <i>Any attempt at cheating will result in the immediate cancellation of your exam.</i></li> <li>• <i>Read all the questions calmly and thoroughly and show all workings clearly.</i></li> </ul>
--

**Good luck!**

**Question 1: [9 Marks]**

<p>We throw a coin three times in a row to see how many heads or tails we get. Consider the following events:</p> <p>A : « We get at least two heads ». B : « We get tails less than three times». C : « We get exactly three heads or exactly three tails ».</p> <p>Verify if the events are independent of each other :</p> <p>a) Are A and B independent events ? b) Are A and C independent events ? c) Are B and C independent events ?</p>	<p>/3 /3 /3</p>
--	-------------------------

**Question 2: [4 Marks]**

<p>Six sprinters compete against each other in a final. How many different arrangements could we have on the podium? (The podium consists of a gold medal winner, a silver medal winner and a bronze medal winner).</p>	<p>/4</p>
---	-----------

**Question 3: [7 Marks]**

a) Find the equation of the tangent line to the function  $f$  at the point  $(1,3)$ , given:  $f(x) = x^2 - 4x + 6$

/5

b) Accurately draw the tangent to the function on the accompanying graph.

/2

**Question 4: [8 Marks]**

Match each of the following functions to their corresponding graph:

Function	Graph
$3\cos(x) - 3$	
$3\sin(x)$	
$\sin(2x + 2)$	
$3\sin(x) + 1$	

/2

/2

/2

/2

A

B

C

D

**Question 5: [7 Marks]**

The following data set can be modelled by the function:

$$f(x) = a \cos(b(x - c)) + d$$

<b>x</b>	2	3	4	5	6	7	8	9	10	11
<b>y</b>	11	9.8	7	4.2	3	4.2	7	9.8	11	9.8

- a) Estimate the amplitude of the function.
- b) Estimate the period of the function.
- c) Estimate the vertical translation of the function.
- d) Estimate the horizontal translation of the function.
- e) Fill in the appropriate values of  $a, b, c$  and  $d$  to write the cosine function which models the data
